

Promoting Sustainable Commuting: Use of Mapua Service Vehicles for SOCIP and Other Activities

Mapua University promotes sustainable commuting by providing service vehicles to employees and students when conducting off-campus activities. Off-campus activities are mostly socio-civic in nature, but the service vehicles are also used for other institutional events and curricular activities. The bus can accommodate up to 60 passengers while the coaster can accommodate up to 40. Smaller vehicles (car, SUV) are also available for those attending meetings and work-related transactions outside the campus. With this provision, employees are encouraged to practice group commuting instead of individually driving to meeting/event venues.
