

# Water Conservation Promotion and Awareness to Partner Communities

October 14, 2020

In support to the off campus effort on water conservation, a community assembly was held through Zoom meeting to encourage community partners to help in the water conservation and create awareness on how people can reduce unnecessary water usage. The meeting was attended by local community officials. Posters were also distributed to help in the information campaign.

Top photo is a group picture of the community officials during the meeting. Bottom photo shows the water conservation slide presentation.

## Office for Social Orientation and Community Involvement Programs

### Water Purifying Facility for the Community

Mapua University donated and installed a Water Purifying Facility in Barangay 860, Pandacan, Manila on April 4, 2021. Aiming for the realization to achieve universal and equitable access to safe and affordable drinking water for all, the newly installed water purifying facility provides free safe drinking water for the less fortunate members of the community. Mapua University is on track for the next five years to install more water purifiers in the future.

The video documentation of the activity can be viewed through the link:

# HELP CONSERVE WATER

Check for leaks in pipes, hoses, faucets, and couplings.

Do not let the water run while cleaning vegetables.

If you wash dishes by hand, do not leave the water running for rinsing.

Plant drought-resistant trees and plants.

Do not leave the water running while washing your car.

Stop using your toilet as an ashtray or wastebasket.

Use pail and dipper while taking a bath.

Install water-saving shower heads or flow restrictors.

Turn off the water while brushing your teeth or while shaving.

Collect rainwater.
